Thanks for purchasing our products .

Here is a quick start guide to help you on installation .

For CD and User Manual Download :

Pls visit : [www.cd-cam.com](http://www.cd-cam.com)

[www.cd-cam.com](http://www.cd-cam.com)

(2)

## 1. Install the APP "AI View "

AI View APP Download and Installation

Method : Search " AI View " on Google Play or IOS APP Store

note: This software will not reveal customers' personal privacy

Android / IOS

## 2. Go to the wi-fi setting of your Phone and find the AI View APP

2.1 Pls note that the AP mode is only used for Local Area Network .

The format of AP SSID like this : HSIPC-XXXXXX Password : 12345678

2.2 The app will search and add the camera automatically when the access point connected . Then click the picture to go on . You have to input a new password for this camera .

## 2.3 Users can realize pre-view, monitor , two way audio ,record ,playback and SD card management these functions.

Tips :  
1.Pls keep the camera off power when you need to insert/pull out the TF Card (Micro SD card)  
2.The TF Card will format to FAT32 when you first use it to the camera .  
3.You can visit the camera when it is connected with access point .  
But if the camera isn't connected with wifi , the image maybe lose . Because the distance of hotspot is short . (We will introduce the wifi setting next step.)

## 3.WIFI Router Setting

### 3.1 WIFI Setting

(1)

(2)

(3)

(4)

(5)

### 3.2 Remote Account Sign up,login and device adding. 3.2.1 Remote Account login

You have to create a account for this camera.The app will go back to the login page when it detects the mobile phone in WLAN status.Pls use the mobile number or email address to login.

### 3.2.2 Login the remote accout and add the camera

The app will search the camera which was connected with hotspot just now . It will turn to the rename page when it detects the online device . Rename and save it to finish this step.

(Note: The camera can only be bound to one mobile device. If you want to visit it by other phone , you can share it to others. We will introduce this function on 4.3 )

Tips:  
1.The mobile phone must be in WIFI or 4G network status when you sign up or login the account.  
2.You can add the device by scanning the QR Code in the product label if it shows search unsuccessfully.  
3.You can visit the camera anytime anywhere when it is added into the account successfully.  
3.3 Other adding method : Connect the camera with power and LAN Cable.

### 3.3.2 Connect the camera with LAN Cable Turn the camera on and connect the LAN cable directly to the camera. (After the network connection is successful, the blue indicator light will remain on)

### 3.3.3 Scan the QRCode to add the device Add device --Scan the QRCode (printed on the label)---Rename the camera --save the setting

Note: You can visit the camera remotely now.  
(Remote access requires first configuring the camera to wifi and then disconnecting the network cable).

Tips:  
1.Only Support 2.4G WIFI Network  
2.Max support 128G TF Card (Micro SD card)  
3.Press the reset button for 8 seconds , delete the record in app  
4.For PC software download pls visit [www.cd-cam.com](http://www.cd-cam.com)
